## A BIT ABOUT ME...

Created, Managed, and Integrated External Content Outsourcing  
Pipelines end to end for Large-scale MMO, PC, and Mobile

Art Direction, Production and  
Artist Management, Technical  
Rigging, Scripting Artist and  
Animator Tools (Python+Maya),  
Asset Integration, Automation,  
Modeling, Texturing, Collegiate  
Teaching, and Training

**XDS** | EXTERNAL  
DEVELOPMENT  
SUMMIT

GAME OF  
THRONES  
CONQUEST™

# SHOP RULES

---

## Format:

- Present an overview of topics ( ~ 30 min )
- Break into teams to discuss innovations within the topics of visual feedback, tools & scripts, and scaling process. ( ~30 min )
- Come together to discuss findings ( time remaining )

## Outcomes:

- Team will share innovations that helped shape their OS careers
- Provide attendees with a list of learnings to explore on their own
- Continue the conversation outside ignite and into Vancouver

The background features a dark, textured surface with large, irregular blocks of red and black. A horizontal dotted line is positioned above the first text block.

**VISUAL FEEDBACK**

**SCRIPT YOURSELF OUT OF A JOB**

**SCALE WITH GREAT PROCESS**

# VISUAL FEEDBACK

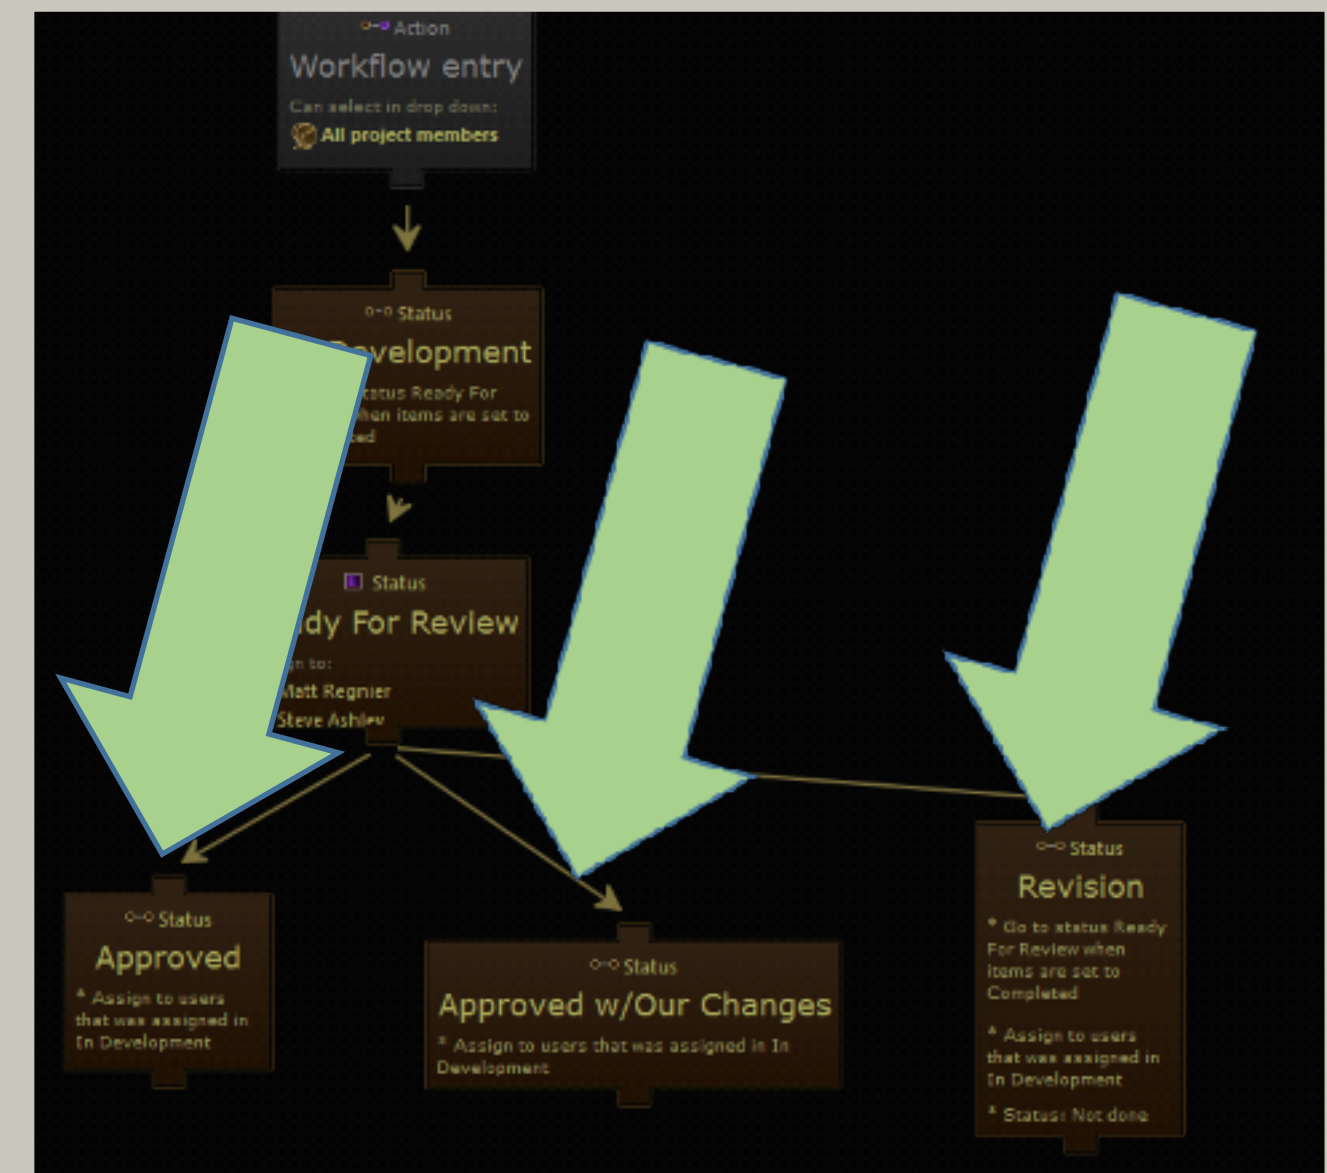

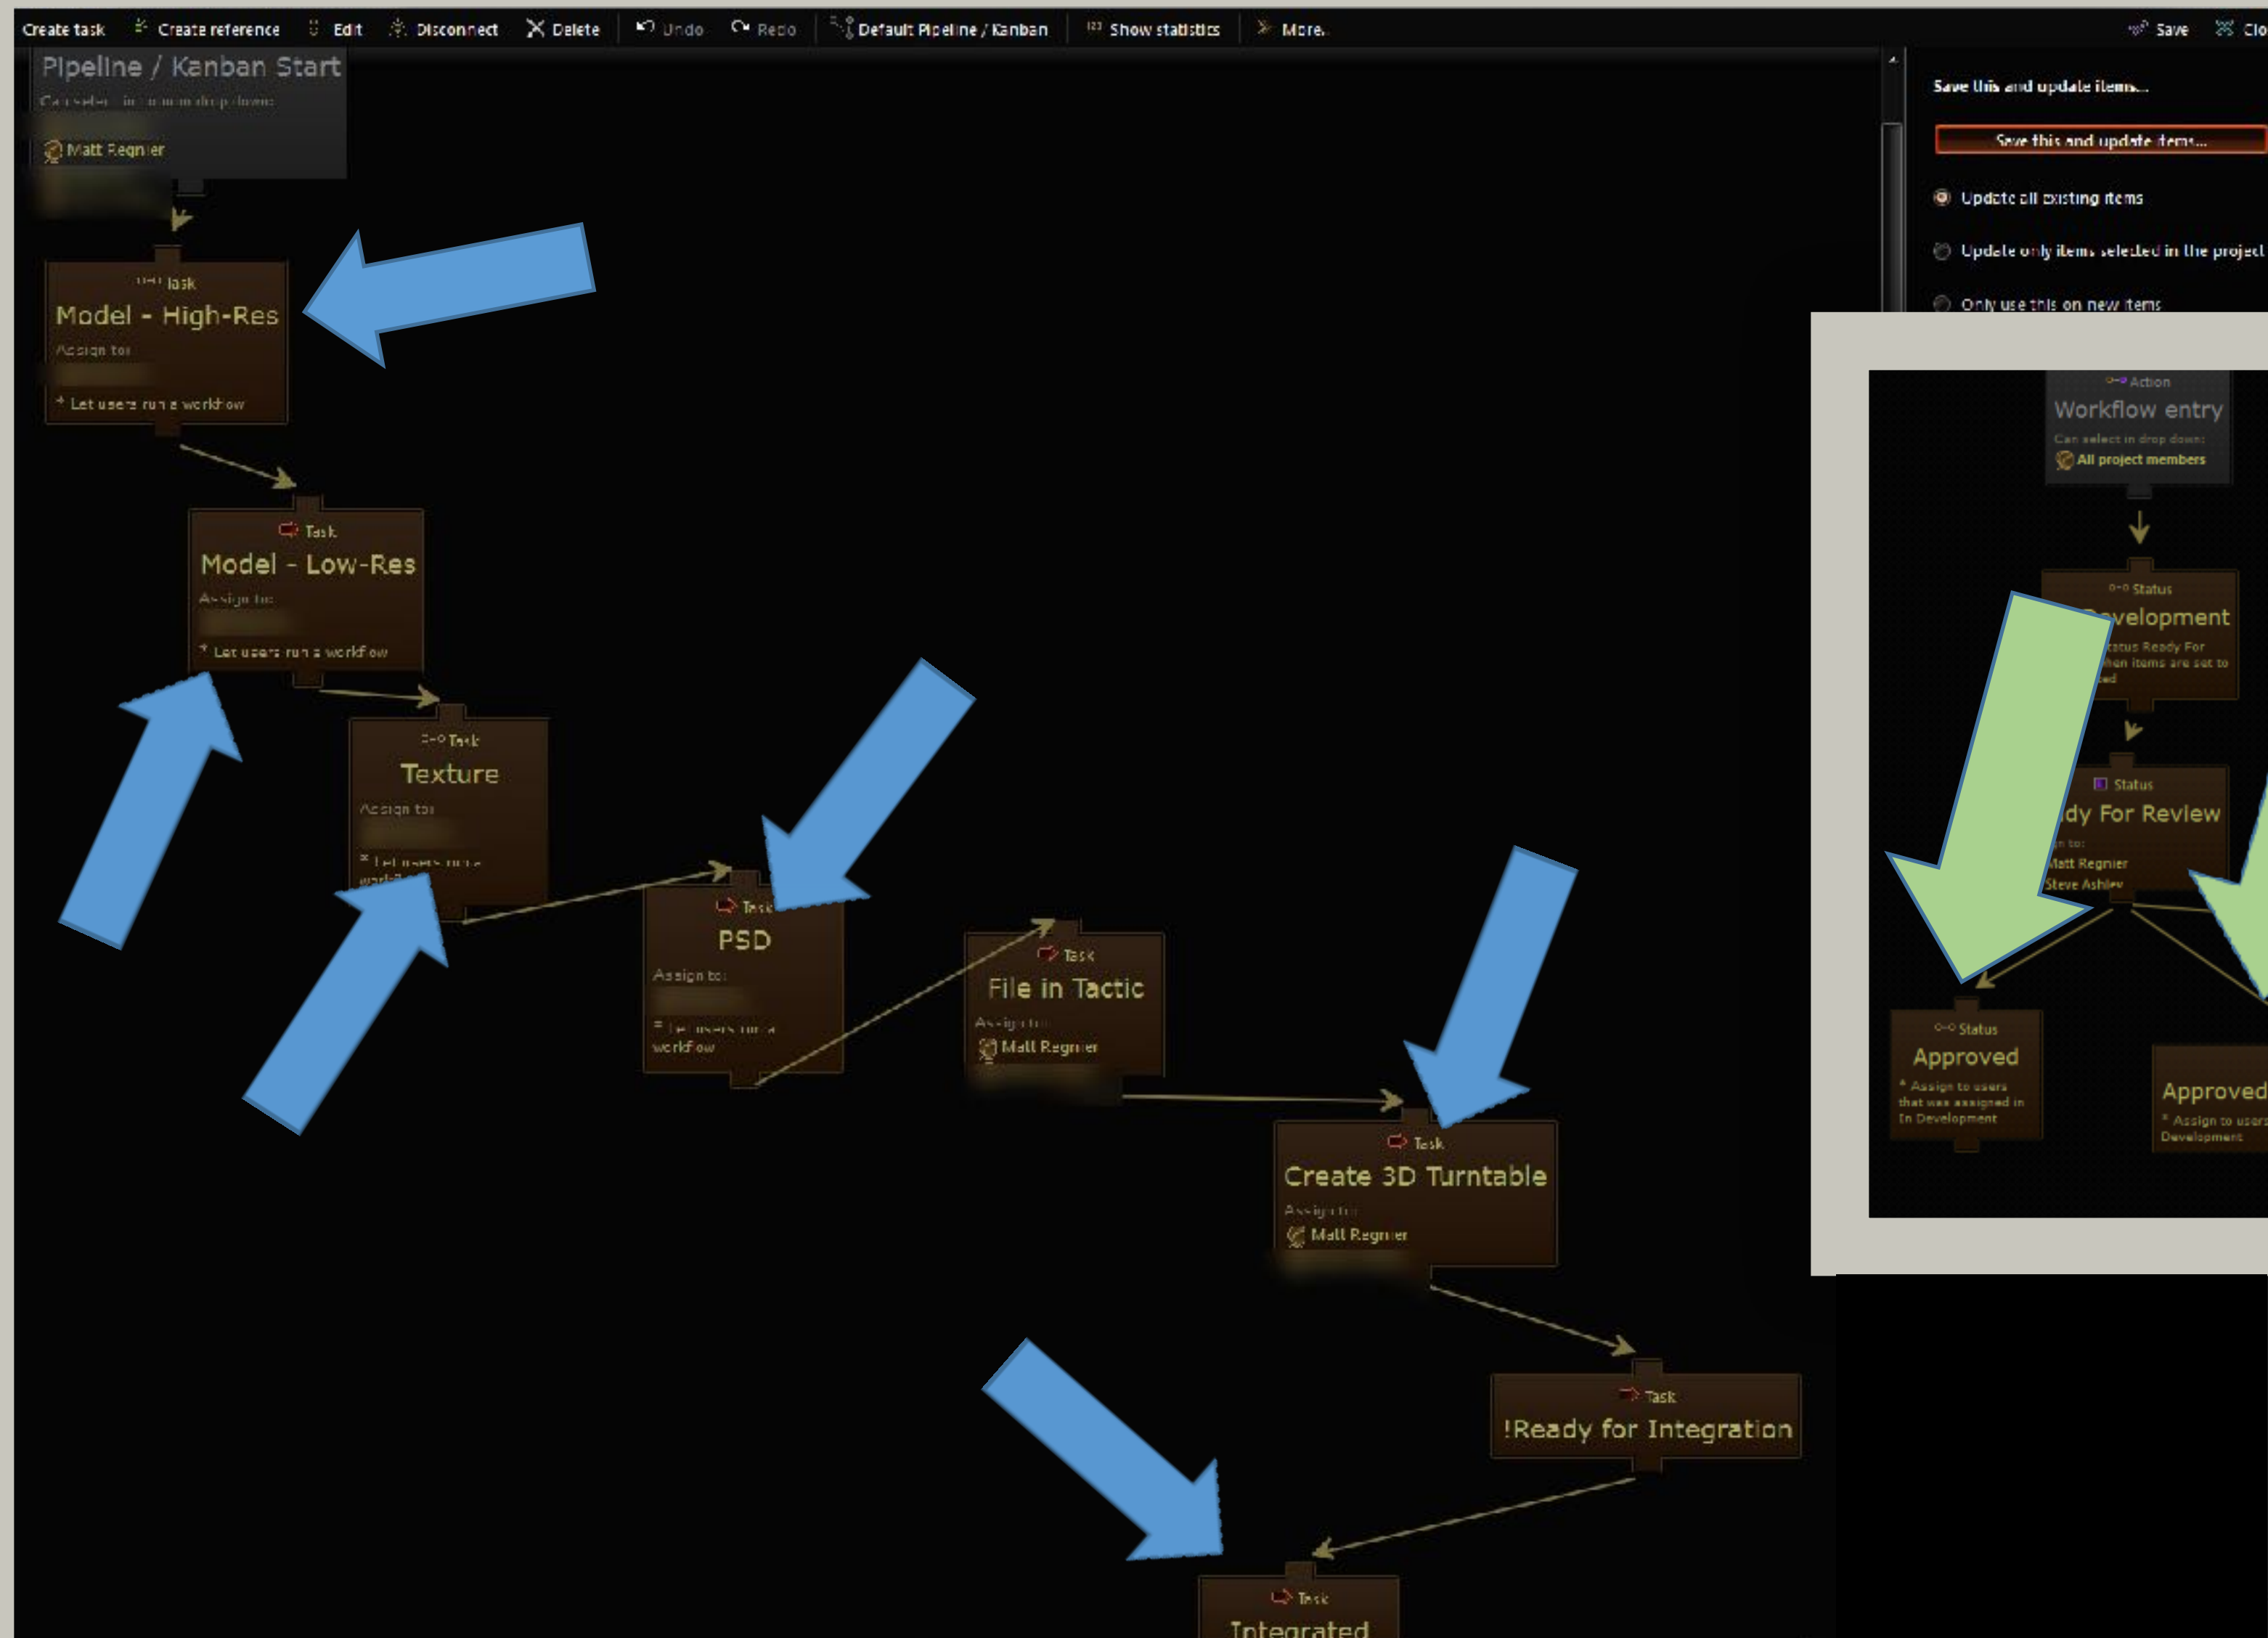

---

- Review against the **CONCEPT**
- Review in **CONTEXT**
- **TWO & OUT** theory
- Should that feedback be in a **GUIDE**?
- Be **CONSISTENT**

# SHOP STUDY – RECAP

- Identify need to include licensor approval / review
- Augmented feedback to ensure higher and consistent quality level BEFORE licensor first review
- Adapted approval pipeline to put turntable render step on my plate to free up internal production
- End result was licensor was happy quality issues addressed and eventually were only approving final assets

# SCRIPT YOURSELF OUT OF A JOB

---

- **AUTOMATION:** Are you clicking the same button multiple times?
- Do you need to **ZIP** files?
- Do you need to **GENERATE** asset lists?
- Need to transfer files?
- Write a script!

# XLRD

```
import xlrd

file = '/Users/mattregnier/Documents/xds_example.xlsx'
wb = xlrd.open_workbook(file)
wb.sheet_names()
sh = wb.sheet_by_index(0)
sh = wb.sheet_by_name(u'Sheet1')

for rownum in range(sh.nrows):
    print sh.row_values(rownum)
```

	A	B	C	D	E
1	first	last	conference	saying	
2	joe	bob	xds	is awesome stuff	
3	mary	sue	xds	is great and amazing	
4					

```
[u'first', u'last', u'conference', u'saying']
[u'joe', u'bob', u'xds', u'is awesome stuff']
[u'mary', u'sue ', u'xds', u'is great and amazing']
```

# SCALE WITH GREAT PROCESS

---

- What problems can be fixed  
**BEFORE** or **AFTER** submission?
- Does a tool already exist? Can you write one?
- Do your homework

# SHOP STUDY – RECAP

- Ensure consistency and quality over a LARGE # of assets with guide
- Created Armor Concept Template (2D)
- Created Armor Zone Template (3D)
- Used these created templates with vendors to ensure guidelines were met

**VISUAL FEEDBACK**

.....

**SCRIPT YOURSELF OUT OF A JOB**

.....

**SCALE WITH GREAT PROCESS**

# AFTER SESSION Q+A WRAP – IE ROUGH CUTS

## Visual Feedback

- Reviewing live with your vendor ++
- Know their team
- Determine review gates before the engagement
- Build a rapport with your licensor
- 70% good enough?
- Review in Context

# AFTER SESSION Q+A WRAP – IE ROUGH CUTS

## Visual Feedback

- Have an Onsite! either the vendor here or you on their turf
- We are people... BOND!
- Partner training! In anticipation of future work train the vendor
- Cultural awareness: be mindful of the world political climate
- Process survive? Can what you have in place survive a vacation, life event, sickness or team change
- Kickoff call with reference packs and discuss the work
- In production pre-mortem: Do a milestone check in to talk about what is working and what is not

# AFTER SESSION Q+A WRAP – IE ROUGH CUTS

## Tools & Scripts

- Perforce syncs and integration: have the team work with you
- Forecasting and automation: Can you automate the contract / sow process with a quick tool?
- Can vendor resources be used to augment internally unavailable team resources? – This proved to be a great topic. If the team does not have time to write the pipeline can that work be outsourced?

# AFTER SESSION Q+A WRAP – IE ROUGH CUTS

## Scope & Scale

- Lots of factors contribute to changes
  - poor planning
  - over budget
  - milestones change
- Good to have long vs. short term goals
  - always weigh the immediate need v the long term larger goal. do not be afraid to make sacrifices in the short term in order to set the team up for success in the long term
- Tech debt will increase over time. If you can fix something today that will save time in the end then do it!

# WRAP

Thank you for your time today. Any final questions?
